

DISABILITY SERVICES

The Dean of Students facilitates the process of academic accommodations for students with disabilities and works in collaboration with other college departments in an attempt to ensure full participation in all activities, programs, and services of the college.

In accordance with applicable law and college policy, Saint Joseph Seminary College ensures equal opportunity for all qualified students with disabilities, without regard to disability, in the programs and services provided by the College.

A person with a disability is any person with a physical or mental impairment, which substantially limits one or more major life activities. Disabilities include but are not limited to physical disabilities, blind or visual impairment, deaf or hearing impairment, psychological disorders, learning disabilities, and ADHD.

Appropriate accommodations enable a student with a disability to compete equally with his non-disabled peers but are not intended to place a disabled student at an academic advantage.
